**Position:** Energy Analyst  
**Start date:** Immediate  
**Location:** Mamaroneck, NY

Unison Energy is a leader in the fast growing Distributed Generation market. Unison owns, installs and maintains Combined Heat and Power (“CHP”) systems based on natural gas-fired engines. Clients include hospitals, hotels, supermarkets, agriculture, university campuses and data centers. Typical system sizes are from 500 kW to 10 MW. Unison owns and operates the systems and sells electric and thermal energy to customers under PPA agreements.

Unison currently has 14 MW of installed capacity in New Jersey, New York, Maryland and California. Unison’s objective is to grow to over 200 systems operating in our core geographies in the next 5-7 years. As we build our client base, we are recruiting a Business Analyst to support our pricing and analytics team.

Unison Energy, LLC is a portfolio company of American Infrastructure Funds LLC, a private equity fund based in San Francisco with assets under management of \$5 billion.

This is a full-time role that begins immediately and is based in Westchester, NY with easy access to the train (40 minutes from Grand Central on the MetroNorth). Our team is smart, ambitious, and passionate and the working environment is energetic and fun and works well together under regular, tight deadlines.

This role has a broad exposure to an entrepreneurial environment with a company undergoing rapid growth in the energy field. This position will have broad exposure to such diverse topics as project finance, commodity markets, sales, legal contracting, and marketing.

## Responsibilities

- Support efforts in pricing and analytics of all cogeneration projects in the pipeline and currently operating
- Maintain and enhance Unison’s proprietary pricing system to improve forecasting capabilities
- Assist with data validation with large real-time operational database of Unison’s cogeneration fleet and Unison’s Tariff DataBase
- Responsible for developing electric and gas tariff analyses
- Lead interactions with utilities to negotiate tariff changes
- Analyze energy markets using Bloomberg and Unison Energy’s proprietary Tariff DataBase to provide pricing support
- Provide analytic support for research projects on natural gas markets, electricity markets and industry changes
- Perform ad hoc analyses as necessary
- Develop client presentations for sales team

## Qualifications

- Degree in finance, mathematics, or engineering is preferred

- Highly analytical with solid experience in financial modeling and advanced Excel functionality
- Comfortable dealing with senior management and working directly for CEO
- Ability to work across multiple departments within an organization
- Team player with the ability to work in a small, early stage office environment
